

2007 Chartwell Solid Waste Digest
Year 17 - Digest 1
Summary of Report Contents
Released 4/09/2007

Solid Waste Digest Featured Report: Scrap Tire Management

This report documents the current state and scope of the scrap tire management market in the United States. Included are graphs and tables on scrap tire disposal markets, scrap tire pile management techniques, end-use markets, and major scrap tire collectors. Also included are details on the regulatory framework for managing scrap tires, as well as a region-by-region breakdown of current scrap tire management regulations and techniques. 10 pages.

Municipal Solid Waste Gate Rates – New England (Chartwell Region #1)

This report represents a summary of recent research findings from gate rates at waste facilities accepting municipal solid waste in Chartwell's Region #1. This region, New England, consists of the states of Connecticut, Delaware, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The report provides the recent low, average, median, high gate rates amongst all surveyed landfills and transfer stations in the region and each state. This recent survey results are compared to same statistics for the same facilities at the turn of the century (2000). 9 pages.

Construction & Demolition Gates Rates – Pacific Northwest (Chartwell Region #10)

This report represents a summary of recent research findings from gate rate at waste facilities accepting construction & demolition in Chartwell's Region #10. This region, the Pacific Northwest, consists of the states of Alaska, Idaho, Oregon, and Washington. The report provides the recent low, average, median, high gate rates amongst all surveyed landfills and transfer stations in the region and each state. This recent survey results are compared to same statistics for the same facilities at the turn of the century (2000). 9 pages.

State Solid Waste Market Digests: Illinois, Georgia, Pennsylvania, Michigan, Wyoming

These individual reports focus on state-level waste management facts and figures. Included are demographic breakdowns of the state as it relates to waste disposal, such as major cities' waste streams, as well as the regulatory framework governing disposal within the state. Also included are specific totals of landfills, waste-to-energy facilities, transfer stations, recycling centers, and other disposal facilities, as well as Chartwell's in-

depth analysis of low, high, and median gate rates for each state as compared to its overall region. 25 pages.

Comparison of the Financial Performance of Publicly Traded Municipal Solid Waste Services Firms

Chartwell tracks all major publicly traded waste services companies for the purposes of charting trends and documenting performance by a variety of metrics. Analyses include changes in revenue, operating income, and net income over recent quarters, as well as operating margin and net profit margin. 7 pages.

2007 Gate Rate Survey – Summary of Recent Survey Group Findings (Survey Group #1)

This report summarizes the results of our 2007 survey effort on gate rates for municipal solid waste and construction and demolition wastes at over 300 facilities across the entire United States. This report provides the low, average, median, and high gates rates found in the 2007 survey with this survey group (survey group 1 of 9). This report provides an update as to how 2007 facility gate rates compared to those found at the same facilities in 2006. 6 pages.
